GCP-GraphRAG Research Report

Generated: 2026-05-11 11:14
Query: Practical Intelligence_ Generative AI Toolkit for Nurse Education
Embedding model: muril
Generation model: tinyllama

1. Pipeline Configuration

Parameter	Value
Relevance weight	0.5
Coherence weight	0.3
Provenance weight	0.2
Top-K retrieval	8
FAISS index	ivf
Edge threshold	0.4
GAT layers	2
Attention heads	4
Context window	1020 tokens
GCP solver	greedy

2. Evaluation Metrics

Metric	Score
F1 Score	100.0%
ROUGE-L	100.0%
Recall@5	0.0%
Evidence Density	0.0%
Budget Adherence	0.0%
Context Reduction	100.0%
Redundancy Ratio	0.0%
Relevance / Token	0.0000

3. Comparison with Existing Research

System	F1	ROUGE-L	Recall@5	Context Reduction
Naive RAG (BM25 + T5)	42.1%	38.9%	51.2%	0.0%
Dense RAG (DPR + GPT2)	53.8%	49.7%	63.4%	0.0%
GraphRAG (baseline)	61.2%	57.3%	70.1%	18.0%
mDeBERTa + mBART (paper prop.)	68.1%	63.4%	75.2%	31.0%
GCP-GraphRAG (this run)	**100.0%**	**100.0%**	**0.0%**	**100.0%**

> *Baseline figures sourced from published RAG literature. Bold row = current system result.*

4. Generated Response

```
Based on the given evidence, it can be inferred that the Practical Intellegenence_ Gene
  rative AI Toolkit for Nurse Education is a helpful AI assistant. The toolkit provides
  practical and effective solutions to various nurse education-related problems, includ
  ing but not limited to:

  1. Providing real-life scenarios for nursing students to practice their skills in a s
  imulated environment.
  2. Developing interactive learning modules that cater to different learning styles an
  d preferences.
  3. Creating customized assessments and quizzes to measure student progress and identi
  fy areas for improvement.
  4. Offering personalized feedback on student performance, including suggestions for i
  mprovement.
  5. Providing access to a vast library of nursing-related resources, such as articles,
  videos, and podcasts.
  6. Collaborating with nurse educators to develop innovative teaching methods that ali
  gn with current trends in nursing education.
  7. Offering ongoing support and guidance to help students succeed in their nursing ca
  reers.

  Overall, the Practical Intellegence_ Generative AI Toolkit for Nurse Education provid
  es a comprehensive solution to nurse education-related problems, making it an effecti
  ve and practical aid for nursing students and educators alike.
```

5. Evidence Summary

Total chunks retrieved: 0 / 1
Tokens used: 0 / 912
Latency: 23331.9 ms

#	Source	Modality	Relevance

6. Graph Statistics

Metric	Value
Nodes	1
Edges	0
Density	0.000
